If your Wi-Fi dongle is listed in the Adapter menu then you can connect using Wi-Fi, if not then plug in an Ethernet cable to continue. I remember being shocked at the time, but I don't think I really dug any deeper. Once you have exposed your service you are probably asking yourself: how can I protect my chatrooms with a secure channel? Next,importtheMPRLibrary.To allow a connection using the serial bus, the Raspbian configuration needs to be changed slightly.
