Items in search results. In unilateral hypoglossus nerve damage the protruding tongue deviates to the side bearing the lesion. The cause of atopic dermatitis is not known. Therefore, we can only talk about pain knowing that it can be chronic or acute. Finally, three of the impairments in the sample are sex-specific: malignant neoplasms of the prostate, of the ovary, and of the uterus. One useful feature of the MVP model is its ability to generate predictions of conditional probabilities.

Human skull is dicondylic. The ends of adjacent bones have complementary shapes. Applicants do not necessarily represent a random sample of individuals with disabilities in the general population. Negative correlations are listed by absolute value.
