Has my in-brain fact checker had too many cups of coffee? And even though it can feel freaky, it turns out it might actually be a good thing. One way to create the sensation is simply to implant false memories in someone – a task that is surprisingly easy.

If the data had been processed correctly, by the amygdala, then it would have

So what is responsible for these feelings of familiarity? For all graphics and marketing campaigns, the colours, fonts etc should be in line with that of your main website and other points of contact with the consumer. It has been proposed that familiarity detection depends on rhinal cortex function, whereas detailed recollection is linked to the hippocampus. Does what it says close to perfection Authenticity is how people will relate to you long term.
