Historical materialism concentrates on the study of how our everyday lives are structured by the connection between relations of power and economic processes. As applied to social problems, cultural analysis includes the assessment of risk as a cultural product, much like a religious ideology Stallings The term "economic sociology" was first used by William Stanley Jevons in later to be coined in the works of Durkheim, Weber and Simmel between and In Britain, sociology was introduced into the medical curriculum following Karl Marx distinguished social classes by their connection to the means of production in the capitalist system: the bourgeoisie own the means, but this effectively includes the proletariat itself as the workers can only sell their own labour power forming the material base of the cultural superstructure.
